Skills

- **Languages**: C, C++, C#, Java, Python
- **Frameworks**: HTML, CSS, JavaScript, Linux, ASP.NET Core
- **Tools/Platforms**: AWS, Cisco Packet Tracer, MySQL, Docker, Cloud Stack
- **Soft Skills**: Analytical Thinking, Adaptability, Team Collaboration, Detail-oriented

Projects

- **Smart Voter List Portal – Secure MVC Application with AWS RDS Integration: | GitHub** Feb 2026

- Developed a secure web-based Voter Management System using ASP.NET MVC and Entity Framework Core, integrated with AWS RDS (MySQL) for scalable and cloud-based database management.
- Implemented role-based authentication (Admin/User), Aadhaar encryption, and duplicate record prevention to ensure secure data handling and integrity across the application.
- Designed an interactive admin dashboard with advanced search functionality and full CRUD operations, leveraging EF Core for efficient database communication and optimized query performance.

- **AI Image Tagging & Detection System – Intelligent Media Management API | GitHub** July 2025

- Developed a secure web-based Voter Management System using ASP.NET MVC and Entity Framework Core, integrated with AWS RDS (MySQL) for scalable and cloud-based database management.
- Implemented role-based authentication (Admin/User), Aadhaar encryption, and duplicate record prevention to ensure secure data handling and integrity across the application.
- Designed an interactive admin dashboard with advanced search functionality and full CRUD operations, leveraging EF Core for efficient database communication and optimized query performance.

- **CPU Scheduler Simulator – Web-based CPU Scheduling Tool: | GitHub** January 2025

- Built a web-based simulator for visualizing CPU scheduling algorithms such as FCFS, SJF, Priority Scheduling, and Round Robin.
- Implemented algorithm-driven process handling using JavaScript, designed responsive input forms and selection options with HTML and CSS, and added visual flow animations for clear scheduling visualization.
- Helped students understand scheduling behavior through real-time calculations and visual execution charts.

Training

- **Data Structures & Algorithm Using C++ | Cipher School | Certificate** June 2025 – July 2025

- Completed an industry-oriented training focused on C++ programming, Data Structures, and Algorithmic problem-solving using Object-Oriented Programming, STL, and file handling.
- Gained strong proficiency in C++, with an in-depth understanding of OOP concepts, STL components, recursive algorithms, sorting and searching techniques, and major data structures including linked lists, stacks, trees, and graphs, further strengthened by hands-on experience with dynamic problem-solving.
- Programmed a Library Management System using C++, implementing OOP concepts and file handling to add, search, display, issue, return, and delete books with persistent data storage.

Certificates

- Cloud Infrastructure Architect Associate by Oracle. Dec 2025
- Responsive Web Design by freeCodeCamp. Sept 2023

Achievements / Co-Curricular Activities

- **Participated in L'Oréal Sustainability Challenge**: Oct 2025
  Successfully completed the Online Aptitude Assessment among nationwide participants, organized by L'Oréal on Unstop.
- **Participated in Adobe India Hackathon**: Aug 2025
  Completed Round 1 – Online MCQ Assessment + Coding Round among thousands of participants, organized by Adobe on Unstop.
- **Participated in CyberSec Symposium 2.0 – National Cybersecurity Conference Participant**: Feb 2024
  Attended CyberSec Symposium 2.0, North India's largest cybersecurity conference, and gained exposure to real-world cybersecurity practices and industry insights.

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; **CGPA: 6.9** Since August 2023
- **Lucknow Public School** Lakhimpur-Kheri, UP
  Intermediate: **Percentage: 77** April 2022 - March 2023
- **Lucknow Public School** Lakhimpur-Kheri, UP
  Matriculation: **Percentage: 89.16** April 2020 - March 2021
